

Effective June 1, 2009 – Notice on Prescription Reimbursements

For better record keeping and processing of **SFBF / VEBA** requests for reimbursement of **prescriptions**, please submit the **actual** prescription receipt showing the patient's name, date of service and amount paid. You can also request from the pharmacy a printout of your prescriptions. This will allow us to reimburse those with spouse coverage from the Health Plan rather than the VEBA. Thank you for your attention to this and helping us better serve you.
